## Overview

Heliomotion PV-650 is a high efficiency, dual-axis tracking photovoltaic solar panel for home use. By following the sun, and using high efficiency solar panels, PV-650 delivers up to twice as much energy as a conventional, stationary solar panel with the same dimensions.

## Panel features

- Tracker holds two 330 watt high performance, high durability BenQ solar panels featuring 20.3% efficiency.
- Generates 5-7 kWh electricity per sunny day, up to 1000 kWh per year in northern Europe or up to 1500 kWh per year in southern Europe.
- With an electricity cost of 0.15 €/kWh the power production corresponds to 150-225€ in annual savings.

## Tracker features

- Automatically determines sun's location from anywhere in the world using GPS and internal calculations.
- Innovative two axis design using only one actuator.
- High precision tracking to maximize energy production.
- Rotates 180° horizontally and 15° to 70° vertically.
- Reliable, low energy consumption and silent operation.
- Fast and cost efficient installation.
