Overview

Heliomotion PV-4 is a high efficiency, dual-axis tracking photovoltaic solar panel for home use. By following the sun, and using high efficiency solar panels, PV-4 delivers up to 50% more energy than a conventional, stationary solar panel with the same dimensions.

Panel features

- Tracker holds four 380 watt high performance solar panels.
- Generates 11-17 kWh electricity per sunny summer day, up to 2200 kWh per year in northern Europe or up to 3100 kWh per year in southern Europe.
- With an electricity cost of 0.15 €/kWh the power produced corresponds to 270-470€ in annual savings.

Tracker features

- Automatically determines sun's location from anywhere in the world using GPS and internal calculations.
- Innovative two axis design using only one actuator.
- High precision tracking to maximize energy production.
- Rotates 180° horizontally and 20° to 70° vertically.
- Reliable, low energy consumption and silent operation.
- Simple and cost efficient installation.
